1. Core User & Profile Data

This section handles authentication and the distinction between a "Creator" and a "Business."

- **`users`**: Handles core login credentials.
  - `id` (UUID, PK)
  - `email` (Unique)
  - `password_hash`
  - `created_at`
- **`profiles`**: The public-facing persona.
  - `id` (UUID, PK)
  - `user_id` (FK to `users.id`)
  - `display_name` (String)
  - `bio` (Text)
  - `profile_type` (Enum: 'CREATOR', 'BUSINESS')
  - `years_in_business` (Integer)
  - `profile_picture_url` (String)
  - **Geospatial Data:** `latitude` (Float) & `longitude` (Float). *Essential for the Creator Map.*
- **`external_links`**: Stores various social handles.
  - `id`, `profile_id` (FK), `platform_name` (e.g., Instagram, TikTok), `url`.

---

2. Niches & Tagging

To allow the "Filter by Niche" feature, we use a many-to-many relationship. This prevents typos and makes searching highly efficient.

- **`niches`**: A master list of categories (e.g., "Streetwear," "Cinematography," "Barbering").
  - `id` (PK), `name` (Unique)
- **`profile_niches`**: Links profiles to their specialties.
  - `profile_id` (FK), `niche_id` (FK)

---

3. Events & Engagement

This powers your "Event Mode" on the map and the ability for creators to find where things are happening.

- **`events`**:
  - `id` (UUID, PK)
  - `host_id` (FK to `profiles.id`)
  - `title`, `description`
  - `event_type` (Enum: 'FASHION_SHOW', 'NETWORKING', 'WORKSHOP', etc.)
  - `start_time`, `end_time` (Timestamp)
  - `latitude`, `longitude`, `address_name` (e.g., "The Liberty Village Commons")
- **`event_rsvps`**: Tracks who is interested or attending.
  - `event_id` (FK), `profile_id` (FK), `status` (Enum: 'INTERESTED', 'GOING')

---

4. Content & Social Graph

For the "Posts" page and the ability for creators to follow one another.

- **`posts`**:
  - `id` (PK)
  - `author_id` (FK to `profiles.id`)
  - `media_url` (Image/Video link)
  - `caption` (Text)
  - `created_at`
- **`follows`**:
  - `follower_id` (FK to `profiles.id`)
  - `following_id` (FK to `profiles.id`)
